

## **Ruby Meidiland Rose**

*Rosa 'Ruby Meidiland'*

Height: 3 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 5

Group/Class: Meidiland Rose

### **Description:**

This compact landscape rose is graced with beautiful blooms of ruby red, in abundant clusters of seven to ten, all season long; its low mounded habit makes it a great low hedge and a perfect companion for perennials; dense foliage is disease resistant

### **Ornamental Features**

Ruby Meidiland Rose is blanketed in stunning lightly-scented double ruby-red flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves turn yellow in fall.

### **Landscape Attributes**

Ruby Meidiland Rose is a multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Ruby Meidiland Rose is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

### **Planting & Growing**

Ruby Meidiland Rose will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
